LearningBench — \$25,000 Grand Prize Winner — Google DeepMind × Kaggle

Mar – Apr 2026

"Measuring Progress Toward AGI: Cognitive Abilities" — 1068 teams

- Won **Grand Prize** as a **solo, first-time Kaggle competitor** with **LearningBench**: Measuring Inference-time learning in LLMs — presents frontier models with entirely new, never-before-seen systems they must learn the rules of from scratch inside a single conversation, testing in-context learning rather than pretrained knowledge recall.
- Featured on **Kaggle's official benchmark page**; currently the **#2 most-voted benchmark** on Kaggle's Community Benchmark. [Project page →](#)

Pokémon TCG AI Battle — The Pokémon Company / Kaggle

June – Sep 2026

- Trained a Transformer game agent through self-play to make decisions with hidden information; placed 19th of 6,807 teams in Simulation and 12th in Strategy. [Technical report →](#)

EXPERIENCE

Co-Founder & CTO — Treow Intelligence (Treow AI)

Oct 2024 – Present

AI-native studio — built a consumer AI product (LuxeAI Studio) and regional-language speech & language models, all on self-hosted infra.

- Treow AI — regional-language speech & language models [huggingface.co/kdcyberdude](#)
- Built proprietary **ASR (100K+ hours, 6.96–10.18% WER on AI4Bharat's IndicSUPERB suite)** and **TTS (1K+ hours)** models; trained **Punjabi small LLMs** on a self-built synthetic dataset.
 - Engineered an **internet-scale ETL pipeline** for sourcing and processing speech + text; reverse-engineered DRM and API-obfuscation layers on commercial platforms to extract Punjabi, Hindi, and English audio at scale.
 - Assembled and ran a self-hosted **7-GPU training rig** (3× RTX 5090 + 4× RTX 4090) — among the most powerful personal AI setups in North India.

- LuxeAI Studio — AI-native studio for personalized photoshoots
- Shipped LuxeAI's end-to-end — studio console (crop-aware training pipeline, realtime generation streams), billing (credit ledger, Stripe/Razorpay, pay-later), and growth (affiliate program, bulk delivery, third-party API).
 - Designed and productionized a **multi-stage ComfyUI generation pipeline — 1290+ nodes** covering segmentation-driven inpainting, ControlNet conditioning, and multi-model scaling — exposed as a parameterized backend service, with Supabase and EC2 routing requests to a **self-hosted home GPU server** for training and inference.

The Parentinc — theAsianparent, parenting [super-app](#)

Apr 2021 – Mar 2024

- Machine Learning & Data Engineer
- Feb 2023 – Mar 2024
- Led vendor evaluation and **migrated the company's Grow Analytics platform to Sigma**; unified analytics, production, and shopping-platform data company-wide via Airbyte pipelines while resolving cross-source consistency issues.
 - Built an **LLM-based recommendation engine** injecting in-shop product recommendations into **1000s of existing articles**.

- Full-Stack Developer
- Apr 2021 – Jun 2023
- Architected **Baby Tracker (100K+ daily active users)**; integrated Flutter into **decade-old legacy Android/iOS codebases**, cutting app size 30%, and built CI/CD pipelines covering validation, build distribution, and auto-translation ([Mojito TMS](#)).

HACKATHONS & COMPETITIONS

Runner-up, 24-hr Hackathon — ADVITIYA Techfest, IIT Ropar • 2nd Place, The Geek Showdown Hackathon, CGC Landran • Winner, Code Debugging & Software Showcase, PLASMA Techfest
