SUMMARY

Founder-engineer across the full AI stack — I train the models, build the product, and run the infra. Trained LLM / ASR / TTS models on internet-scale data (**100K+ hours** of speech), architected a self-hosted multi-GPU fleet, and shipped consumer products to **100K+ daily active users**. At home in ambiguous, zero-to-one problems from research through production.

EXPERIENCE

Co-Founder & CTO — Treow Intelligence Oct 2024 – Present

AI research-and-product studio — a consumer AI product (LuxeAI Studio) and regional-language speech & language models (Treow AI), all on self-hosted infra.

LuxeAI Studio — consumer AI photography, studio-grade shoots from user photos console.luxeai.studio

- Built and shipped LuxeAI **end-to-end** — users upload real photos, get a fully personalized diffusion model trained on their subject, and receive studio-grade shoots across 5 verticals (newborn, maternity, couples, kids, portrait).
- Architected the self-hosted GPU backend — a **multi-GPU training + inference fleet** with per-customer FLUX fine-tunes, ComfyUI orchestration, Supabase-as-job-queue, and a 3-stage couple-generation pipeline (mask inpainting → dual-checkpoint consistency).
- Shipped the entire product surface — Flutter app + studio console (guided onboarding, crop-aware training pipeline, realtime status, credit ledger, Stripe / Razorpay / pay-later, affiliate program, bulk delivery) on Supabase, EC2, S3, Bunny CDN, Cloudflare.

Treow AI — regional-language speech & language models huggingface.co/kdcyberdude

- Built proprietary **ASR (100K+ hours)** and **TTS (1K+ hours)** models and trained **Punjabi small LLMs** on a self-built, large-scale corpus.
- Engineered an **internet-scale data pipeline** for sourcing and processing speech + text; reverse-engineered DRM and API-obfuscation layers to unlock Punjabi / Hindi / English audio at scale.
- Built a self-hosted **7-GPU training rig** (3× RTX 5090 + 4× RTX 4090) — among the most powerful personal AI setups in North India.

The Parentinc — theAsianparent, parenting super-app Apr 2021 – Mar 2024

Machine Learning & Data Engineer Feb 2023 – Mar 2024

- Engineered scalable ETL pipelines (BigQuery, Airbyte, Sigma, Apache Superset) plus custom Python extraction, powering data products across the company; built a personalized recommendation engine using LLMs.
- Resolved critical pipeline failures through root-cause analysis to minimize downtime; authored SOPs and documentation that cut new-engineer onboarding time.

Full-Stack Developer Apr 2021 – Jun 2023

- Architected and built **Baby Tracker (100K+ daily active users)**, owning app architecture and state / data flow.
- Led Flutter integration into existing Android / iOS apps; **cut app size 30%** via targeted optimization; built an auto-translation library wired into CI/CD ([Mojito TMS](#)).

Earlier Founder, [Artistic Hobby](#) — artist collaboration platform (2019–20) · Freelance Flutter Developer — cross-platform [e-commerce app](#) (2020).

SKILLS

AI / ML LLM training & fine-tuning, ASR, TTS, diffusion models, ComfyUI, dataset engineering

Data / Pipelines internet-scale data acquisition & processing, ETL (BigQuery, Airbyte, Apache Superset, Sigma), web scraping, Python, SQL

Infra / MLOps multi-GPU training & inference, self-hosted GPU fleets, AWS (EC2 / S3), Supabase, Bunny CDN, Cloudflare, Docker

Languages & Product Python, Dart, C / C++, Java, JavaScript, SQL · Flutter (iOS / Android), full-stack app dev, Stripe / Razorpay

EDUCATION

Lyallpur Khalsa College of Engineering 2016 – 2020

B.Tech, Mathematics & Computer Science · GPA 8.61 / 10

HONORS

Runner-up, 24-hr Hackathon — ADVITIYA Techfest, IIT Ropar · 2nd Place, The Geek Showdown Hackathon, CGC Landran · Winner, Code Debugging & Software Showcase, PLASMA Techfest
